DETAILED ACTION

Papers Received

Receipt is acknowledged of the applicant's response and petition for extension of time, both received on 26 October 2006.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The rejection of Claims 1-24, 33 and 34 under 35 U.S.C. 103(a) over Perkes (WIPO Publication No. WO 99/07400) in view of Shrikhande *et al.* (U.S. Patent No. 6,544,581) is maintained.

Response to Arguments

Applicant's arguments filed 26 October 2006 have been fully considered but they are not found to be persuasive.

Contrary to what the applicant asserts, the proper analysis of obviousness rests on the factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), by determining the scope and contents of the prior art; ascertaining the differences between the prior art and the claims at issue; resolving the level of ordinary skill in the pertinent art; and considering objective evidence present in the application indicating obviousness or nonobviousness.

Here, the applicant's invention is described broadly as a composition comprising a grape skin extract and a Muscat grape seed extract. The difference between the Perkes reference and the instant claims is the explicit mention of the use of Muscat grapes. To resolve the level of one of ordinary skill in the art, one looks to the disclosure of Shrikhande et al., which gives the disclosure of the use of Muscat grape seeds in the course of obtaining a nutritional composition. In considering the objective evidence present, given the wide variety of grapes that are available. it stands to reason that some varieties are more useful than others in imparting health benefits, since all grapes are clearly not the same from variety to variety. Thus, one of ordinary skill in the art would look to Shrikhande et al. for guidance. Here, one of ordinary skill in the art is not bound to only what the prior art has disclosed as the best embodiment. Other useful embodiments are considered fairly taught in the prior art when resolving the difference between what is disclosed by the prior art and what the applicant is actually claiming. Thus, the disclosure of the use of Muscat grapes is not deemed to be a mere mention within the prior art. The examiner considers such a disclosure to be fair and proper guidance over the myriad varieties of grapes that exist that could conceivably be used in the invention of Perkes. Thus, the applicant's invention is deemed prima facie obvious in view of the prior art. Therefore, the prior art rejection of record is maintained.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Simon J. Oh whose telephone number is (571) 272-0599. The examiner can normally be reached on M-F 8:30 am to 5:00 pm.
